determined by Mass Save.

# Estimated APOLLO rebate amounts by model

Estimates apply Mass Save's 2026 rate and cap to published APOLLO qualified-product capacities.

| APOLLO MODEL   | REFERENCE<br>CAPACITY | STANDARD<br>ESTIMATE | INCOME-BASED<br>POTENTIAL* |
|----------------|-----------------------|----------------------|----------------------------|
| AP-EVI-DC-3.5T | 2.00 tons             | \$5,300              | Up to \$16,000             |
| AP-EVI-DC-5T   | 4.00 tons             | \$8,500              | Up to \$16,000             |
| AP-EVI-DC-6T   | 5.54 tons             | \$8,500              | Up to \$16,000             |

How the estimates were calculated

Reference capacity is multiplied by \$2,650, then capped at \$8,500. Mass Save confirms final eligible tonnage and QPL status.

\* Eligible households may receive 80% of installed cost, up to \$16,000. Final payment is determined by Mass Save.

## Check eligibility before purchasing

### The project must meet these requirements

- Full-time Massachusetts residence during winter
- New equipment installed January 1-December 31, 2026
- Model currently listed on the Mass Save HPQPL
- Mass Save Heat Pump Installer Network contractor
- Displaces oil, propane, gas, or electric resistance heat

### How to claim the rebate

- 01 Confirm eligibility or pre-verify
- 02 Hire an HPIN contractor
- 03 Install qualified equipment
- 04 Apply online and submit documents

#### 0% HEAT Loan

Eligible customers may finance up to \$25,000 for qualified home improvements.

Income-based incentive: up to \$16,000; Cape Light Compact enhanced amounts differ.

*Applications for 2026 installations must be received by February 28, 2027.*
