Final eligibility and rebate amount are  
determined by the program.

## Estimated APOLLO rebate amounts by model

Estimates use the capacity in Vermont's qualified-product record and the current published rebate rates.

| APOLLO MODEL   | QPL<br>CAPACITY | STANDARD<br>REBATE | WITH \$500<br>INCOME BONUS* | BURLINGTON ELECTRIC<br>SEPARATE OFFER |
|----------------|-----------------|--------------------|-----------------------------|---------------------------------------|
| AP-EVI-DC-3.5T | 2.00 tons       | \$2,000            | \$2,500                     | \$4,000                               |
| AP-EVI-DC-5T   | 4.00 tons       | \$4,000            | \$4,500                     | \$8,000                               |
| AP-EVI-DC-6T   | 5.54 tons       | \$5,540            | \$6,040                     | \$11,080                              |

### How the estimates were calculated

QPL capacity × published rate. The \$500 bonus is for eligible Vermont residents; rental property owners are excluded. Burlington Electric is a separate program.

*Final eligibility and payment are determined by the program administrator.*

## Check eligibility before purchasing

### The project must meet these requirements

- New equipment installed in Vermont
- Model listed on the QPL at the time of purchase
- Water-based distribution system, ideally radiant heating
- Efficiency Excellence Network air-to-water contractor
- Commercial new construction is not eligible

### How to claim the rebate

- 01 Hire a participating contractor
- 02 Install qualified equipment
- 03 Apply online or use the rebate form
- 04 Submit proof of purchase

#### Burlington Electric customers

Separate offer: \$2,000 per qualified ton. Apply directly through Burlington Electric.

Income bonus: available to eligible Vermont residents; rental property owners are currently excluded.

*Efficiency Vermont notes that a fossil-fuel heating system generally remains as backup.*
